GEW AND SADECHAF FORM ALLIANCE FOR BENELUX

January 2008. In a move to strengthen its presence in the Benelux countries, UK based UV systems manufacturer GEW (EC) Ltd. has announced its alliance with Sadechaf UV and IR Technology for the sales and service of its equipment in the region.

Based in Turnhout, Belgium, Sadechaf is a service oriented, privately owned company that has over 15 years experience with UV systems for all the major printing processes as well as for coating and specialised industrial applications. Commenting on the move, Company Director, Louis Michielsen said: "GEW is the market leader in UV equipment for the narrow web printing industry and has huge potential in other market sectors. We have extensive experience in the integration of UV curing for industrial applications and other processes. GEW's products are a good fit that will help us to achieve our aim to be the UV partner of choice in the Benelux countries".

Comments Malcolm Rae, GEW Managing Director; "Sadechaf has an in-depth knowledge of other printing processes and industrial applications for UV. This cooperation will enable us to further develop our activities in the region and offer a complete service for our products that will include pre-sale, site inspection, machine installation, and maintenance".

GEW (EC) Ltd. manufactures UV curing systems for all makes of printing presses and supplies both manufacturers and end users of printing and coating machinery. The company has built a strong reputation as market leaders of web-based UV curing systems. Located near London, England, GEW manufactures all its products in-house. These are available together with spare parts and after sales service on every continent through its satellite offices and distribution network.
